

Have you ever been to the Mississippi Children's Museum? If you haven't you should. It's amazing!!! It's more of a giant playground than a museum. It's filled with color. There's a huge underground tunnel that leads throughout the museum. You are able to crawl up to other sections of the museum too. Also they have a big water works system that you can control. You can fish for catfish there also. You are also able to explore a boat. Also you crawl through tunnels and slide down a swirly slide. It's awesome there.

If that doesn't impress, I don't know what will. I really think you should go to it. I had a great time and I know you will. I had so much fun I want to go there again.
